

**Effective March 2<sup>nd</sup>, 2015. Texas Pneumatic Systems, Inc. (TPS) and Turbine Fuel Systems, Inc (TFS) RS#TFOR552Y, providers of FAA maintenance repair and overhaul services for pneumatic and fuel accessories today announced an integration of the two business into one operating company and all services will be completed under the TPS, Inc. Repair Station Certificate T4XR853J. This move was taken to streamline services for our customers and better position the organization to streamline its operations and provide enhanced service for our customers.**

Customers of TPS and TFS will experience an immediate benefit from an improved level of customer service and technical support. Both operations will remain in Arlington, Texas, so our customers will experience no delay in service or quoted turn-around times. The change will provide you the ability to place repair orders for both pneumatic and fuel units with a single approved vendor, reducing your administrative cost and streamline your quality systems, payable processes and repair management.

For all customers who currently have components at TPS, there is no change. For those of you whom currently have units at TFS, you will be contacted by your customer service administrator within the next week to work with you on modifying your repair orders as necessary.

We are thankful for the opportunity you have given us to serve you in the past and are excited about the opportunity this change will provide to improve and expand to serve you even better. I look forward to sharing more about this exciting opportunity over the coming months. If you have any questions, please contact Teles Garza, TPS Customer Service Manager – 817 794 0068- ext. 2140 or Teles@txps.com. I invite you to visit our website at [www.txps.com](http://www.txps.com), where you can read the press release regarding this event.

Thank you for supporting all that we do.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bernie Rookey', written in a cursive style.
